rohithg2285@gmail.com

PROFILE

Motivated Electronics and Communication Engineering student with strong interest in Data Science, Business Intelligence, and Analytics. Skilled in Power BI, SQL, Python, Excel Analytics, and data modeling with hands-on experience in dashboard development, ETL workflows, KPI reporting, and analytical problem-solving. Passionate about transforming raw data into actionable business insights and building scalable data-driven solutions.

EDUCATION

B.Tech in Electronics and Communication Engineering Amrita School of Engineering, Coimbatore CGPA: 7.15	2023 – 2027
Higher Secondary (HSC) The Velammal International School, Chennai Score: 79.80%	2022 – 2023
Secondary School (SSLC) Shri Maharishi Vidya Mandir, Dindigul Score: 86%	2020 – 2021

TECHNICAL SKILLS

- **Programming & Data Analysis:** Python, SQL
- **Machine Learning Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- **Business Intelligence:** Power BI, Power Query, DAX, Dashboard Development
- **Data Modeling:** Star Schema, Relationships, Cardinality, Fact-Dimension Design
- **Excel Analytics:** Pivot Tables, XLOOKUP, INDEX-MATCH, Interactive Dashboards
- **ETL & Data Transformation:** Data Cleaning, Merge, Append, Pivot/Unpivot Operations
- **Cloud & Tools:** Power BI Service, Basic Google Cloud Platform (GCP)
- **Core Concepts:** Data Visualization, KPI Design, Data Storytelling, Data Warehousing Basics
- **Development Practices:** Agile Methodology, Analytical Problem Solving

PROJECTS

Power BI Sales Analytics Dashboard

- Developed interactive Power BI dashboards to analyze sales, profit, KPIs, and customer trends.
- Performed data cleaning, profiling, and transformation using Power Query.
- Designed star schema data models with optimized relationships and cardinality.
- Implemented DAX measures for Total Sales, Profit, Discounts, and Order Metrics.
- Built dynamic visuals for time-based sales analysis and top/bottom product insights.
- Improved business decision-making through interactive KPI reporting and dashboards.

UPI Transactions Data Analysis Dashboard

- Built an interactive Power BI dashboard to analyze UPI transaction behavior and trends.
- Created calculated columns for demographic-based segmentation and analytics.
- Implemented KPI dashboards, matrix reports, slicers, bookmarks, and synced filters.

- Published reports to Power BI Service for cloud-based accessibility and sharing.

Insurance Analytics Dashboard with Security & Deployment

- Developed end-to-end insurance analytics dashboards using Power BI and Power Query.
- Designed visuals including cards, charts, donut reports, and drill-through analytics.
- Configured scheduled refresh and implemented Row-Level Security (RLS).
- Applied deployment, validation, and report optimization best practices.

UIDAI Data Hackathon 2026 – Aadhaar Service Demand Analytics

- Designed a three-layer analytical framework for Aadhaar enrolment and update analysis.
- Used Python-based data analysis techniques to process operational datasets.
- Identified age-wise and state-wise service delays and operational bottlenecks.
- Generated actionable insights for service planning and capacity optimization.

SQL Project – Delayed Delivery Root Cause Analyzer

- Analyzed delayed deliveries using SQL-based time comparison logic.
- Classified delay causes using CASE statements and operational metrics.
- Calculated SLA breach percentages and city-wise delay analytics.
- Supported logistics optimization through analytical reporting.

SQL Project – Demand Forecasting & Inventory Optimization

- Analyzed historical sales data using SQL aggregations and trend analysis.
- Forecasted short-term demand and identified stockout and overstock risks.
- Recommended optimized reorder levels to reduce holding costs.

Excel Social Media Analytics Dashboard

- Built an interactive Excel dashboard using Pivot Tables, charts, and slicers.
- Analyzed engagement metrics including impressions, reach, likes, and shares.
- Identified growth trends and high-performing content strategies.

AREAS OF INTEREST

- Data Science
- Business Intelligence
- Data Analytics
- Dashboard Engineering
- Cloud-Based Analytics
